Summary

Junior Full Stack Developer with experience in production web applications and current work on software development, requirements, documentation, discovery and backlog organization. Main stack: TypeScript, React/Next.js, Node.js, PostgreSQL, AWS and Azure DevOps; I use AI as a supervised support tool for analysis and documentation.

Experience

Junior Full Stack Developer – Contractor — ControlLed Apr 2026 – Present

- Supported discovery, MVP definition, requirements organization and high-level functional/technical documentation.
- Created and reviewed SRS, FRD, user stories, acceptance criteria, prioritization matrices and presentations.
- Structured backlog items in Azure DevOps and used supervised AI workflows for transcript analysis, decision summaries and document review.

Full Stack Development Intern — Blue Exams / The Mindville / MBA No Brainer Apr 2025 – Dec 2025

- Built and maintained web applications with end-to-end delivery across frontend, backend and database layers.
- Created REST APIs and integrations with Next.js, Node.js, NextAuth, Stripe, PostgreSQL and Prisma.
- Supported deployment and operations on AWS, Linux, Nginx and Docker, including troubleshooting and data/asset migration.

Selected Projects

Blue Exams — Mock exam subscription platform 2025

- Web platform with authentication, billing, exam flows, dashboard and PostgreSQL/Prisma persistence.

McIntosh V8 — Mobile game in Unity 2026

- Personal Unity/C# project with vehicle physics, touch controls, endless road, procedural traffic, audio and scoring.

C language compiler 2024

- C compiler for a C– language with lexical, syntactic and semantic analysis, intermediate code generation and RISC processor in Verilog.

Education

Federal University of São Paulo (UNIFESP) — Computer Engineering (in progress) 2024 – Expected Jun 2027

Federal University of São Paulo (UNIFESP) — Science and Technology (BSc) 2021 – 2023

Skills

- **Web:** TypeScript/JavaScript, React, Next.js, Node.js, Express, HTML5, CSS3, Tailwind CSS, REST APIs
- **Data, Cloud & DevOps:** SQL, PostgreSQL, Prisma, DBeaver, AWS, Docker, Nginx, Linux
- **Product, Requirements & AI:** discovery, SRS, FRD, user stories, acceptance criteria, backlog, Azure DevOps, transcript analysis, decision summaries
- **Other:** Python, C/C++, Unity, C#, URP, Input System, vehicle physics

Languages

Portuguese (Native) | English (Advanced – technical reading and communication)

Activities

University basketball team captain, with experience organizing practices, group communication and competition participation.
